Press Release

October 2, 2013

SOLAR 3001 12 Volt Commercial Jump Starter with Air from Clore Automotive

Clore Automotive presents Model No. 3001, a 12 Volt commercial jump starter with an onboard air compressor, from **SOLAR**. This multi-purpose unit provides endless jumps and the convenient delivery of air for auto lots, auction houses, fleet operations, implement dealerships and other starting environments with high vehicle counts and stubborn starting situations.

Model No. 3001 utilizes a user-installed Group 31 Battery to deliver its jump starting power and incorporates 5-foot retractable jumper cables, enabling easy access to the starting points on vehicles of all shapes and sizes. It features an enhanced, automatic charging system that enables easy charging and maintenance of the installed battery when not in use. The charging system can be optimized to properly charge both flooded or AGM battery types. Model 3001 adds the delivery of shop air with a heavy-duty onboard air compressor with auto shut-off at an adjustable, preset PSI.

The 3001 features a rugged, high impact case and industrial-grade construction designed to stand up to everyday use in even the harshest of conditions. Its EZ View™ Control Panel makes monitoring service progress quick and easy, featuring large gauges that are easily viewed from a distance during service. Large pneumatic wheels and a small footprint allow this unit to be maneuvered on all types of terrain and in all shop environments.

Clore Automotive is a leader in the design, development and manufacture of automotive service equipment for professionals and consumers, including jump starters, battery chargers, battery testers, power inverters, heavy-duty starting equipment, cooling system service equipment and automatic transmission fluid exchange equipment. More information can be found at www.cloreautomotive.com.
